## SKILLS

React | Redux | Node | Express | Javascript | Python | SQL | HTML | CSS | Git

---

## PROJECTS

### Recipe Version Control App

[GitHub](#)

An app designed to give users the ability to fork and clone their own versions of popular recipes.

HTML | React | Node | CSS | Redux | Express | PostgreSQL

- React was used for hooks and functional components for reusable components.
- Redux and Redux-Thunk were used for state management and asynchronous actions respectively.
- Used Axios for API requests for CRUD operations.

### Open Banking App

[GitHub](#)

An app that connects and manages users' bank account details and transactions.

HTML | React | Node | CSS | Redux | Express | MongoDB

- Used MERN stack as well as Material-UI styling for clean, fullstack login/auth and banking capability.
- Used Plaid's API to link and retrieve user's open banking details and view transactions.
- MongoDB was used for a schema-less database and deep query-ability.

---
